

Whether you are trying to pull a report of every open claim in your system, or your patient is trying to pull their payment history for their taxes; Redde has the reporting tools you are looking for.

And every report and table in Redde can be sorted and filtered online, or exported directly to excel.

Here's the best part, Redde has a built-in analytics engine that runs live on the platform! So no more waiting on batch processes, or analysts to do a report rollup for you. With Redde, you can finally have a real-time view into your AR and claims management, saving you time and money.

You're welcome.

Hey, can I get a copy of all the payments I made to you this year?

Certainly. If you want to come by our business office sometime next week we should have that ready for you.

Uggh...
