Simple to Access

Your patients are used to intuitive platforms that take little to no effort to set up and start using immediately. Healthcare platforms should be no different.

That means you need an account creation process that's not reliant on medical record numbers, impossible to remember access codes, or help from your billing office.

Redde can help with that.

- Post-visit text and email invite
- No-login payment options
- Easy self-service account setup
- Intuitive family account setup
- Family linking via responsive texting

Do you have any payment options?

Yes! Call Billing.

Ugh... can't I just pay online?

Sure. Just use your easy pay access code: 159SFA49GS173VS496...

STOP.
